

Natural disaster Impact Survey promotion

Help spread the word about the department's Natural Disaster Impact Survey, which has been designed to help the Queensland Government and industry quickly assess an impacted area. The data collected helps provide evidence for appropriate levels of assistance to support disaster recovery under jointly funded Commonwealth-State Disaster Recovery Funding Arrangements. The below content can be used as a newsletter article or social media post to promote the survey.

Natural disaster survey supports faster disaster assessment for producers

With extreme weather events just around the corner, now's the time for Queensland producers to get ready. As part of preparing for the disaster season, producers are encouraged to familiarise themselves with the Department of Agriculture and Fisheries' [Natural Disaster Impact Survey](#). The survey has been designed to support producers who have experienced losses or damage to their property during a disaster event. The information collected through the survey helps the Queensland Government determine the appropriate level of disaster recovery assistance to provide under jointly funded Commonwealth-State Disaster Recovery Funding Arrangements.

Producers can also complete the survey via the Department of Agricultural and Fisheries' [natural disaster ehub](#) during and after a natural disaster event. It's easy to use and takes less than five minutes to complete. Check it out today!
